# COMMUNITY MEETING

**Join us to learn about the**
**Water Resource Recovery Facility Project**

December 8, 2022
6:00 - 7:00pm
4870 Heritage Road

**HRCSD is making necessary updates to its wastewater treatment plant. These critical investments will impact HRCSD customers' utility rates. Join us as we discuss the project's purpose, impacts, and next steps.**

*Scan to RSVP or visit HeritageRanchCSD.ca.gov*

# HRCSD is making necessary upgrades to achieve compliance and sustainably meet the long-term needs of the community and the environment.

The Heritage Ranch Community Services District (HRCSD) was formed in 1990 to provide local water and sewer services to the community.

The Heritage Ranch CSD Wastewater Treatment Plant was originally built in 1978. The Plant operates 24 hours a day, 7 days a week, supporting public health and protecting local water quality.

Currently, the facility treats approximately 200,000 gallons of water a day.

New regulations and requirements call for substantial improvements to the Plant.
